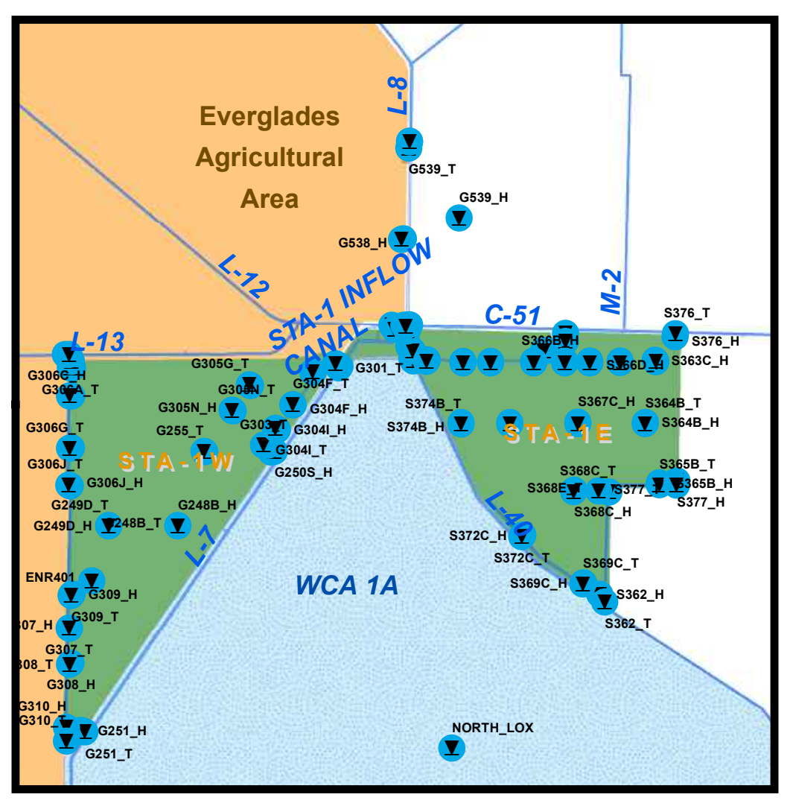
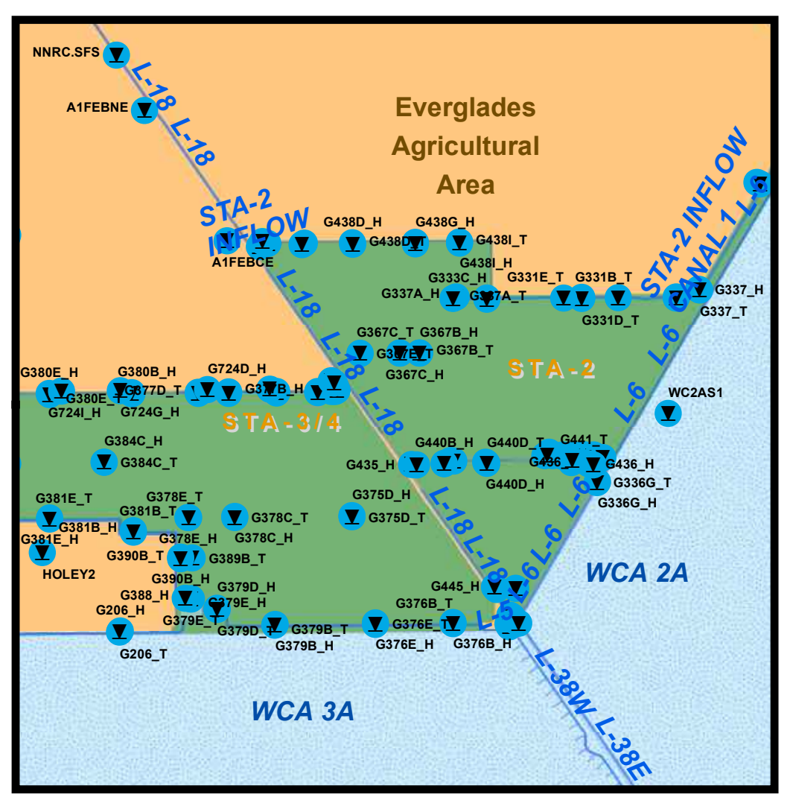
Location Map

Detailed Inset Maps

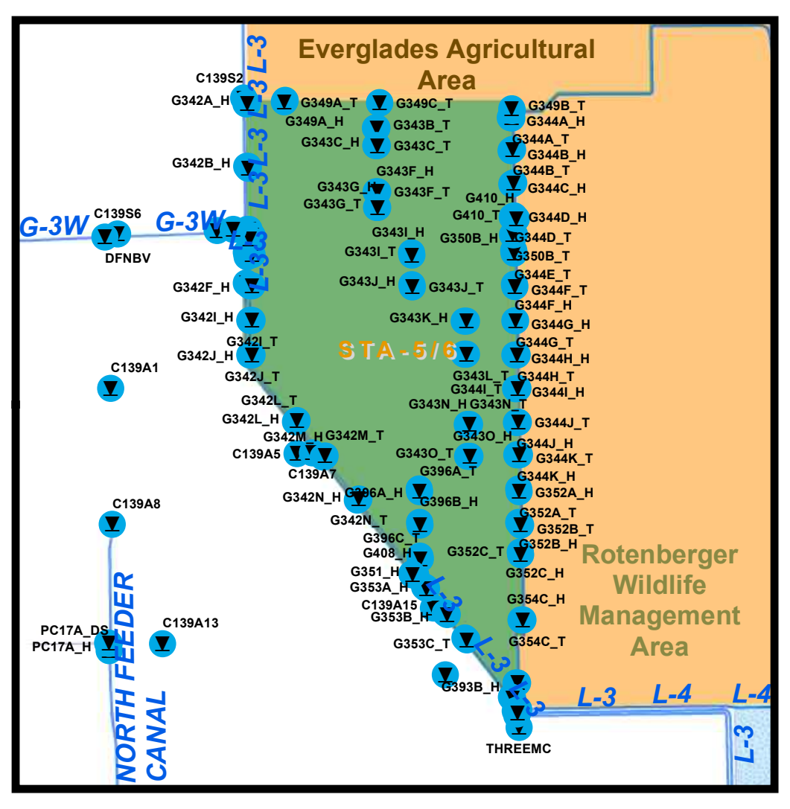
Inset 1: STA-1W and STA-1E



Inset 2: STA-3/4 and STA-2



Inset 3: STA-5/6



Site/Station Definition:

STATION:
A specific coordinate that indicate where data (observation, sampling or monitoring) are collected. Data are usually assigned to stations by various classifications such as stage, flow, weather, and water quality. A coordinate may have more than one station associated with it. The name given to a station has traditionally been similar to, or an exact duplicate of, the corresponding site name.

SITE:
A representative point used to designate one or more stations that are associated by proximity or project. Site level representation is to provide clarity for small scale mapping in lieu of displaying a high density of associated stations. The site location is often based on the position of a recording device such as a remote terminal unit (RTU), or can be derived from a common sense location between the associated stations. A site should not be viewed as an area feature with specific boundaries but simply as a representative location of activity.

IMPORTANT DISCLAIMER:

This map is a conceptual or planning tool only. The South Florida Water Management District does not guarantee or make any representation regarding the information contained herein. It is not self-executing or binding, and does not affect the interests of any persons or properties, including any present or future right or use of real property.

Monitoring sites represent current and active locations monitored by SFWMD, other agencies and contractors. The data for monitoring sites are stored in DBHYDRO corporate database. Status of non-SFWMD data is based on the date of the most recent data received. All sites coordinates are gathered using approved professional- grade GPS receivers with sub-meter accuracy.
